

Zambia YAB inputs

On Friday, 17 April 2026, the Zambia team held a YAB meeting at Build It International. Please see below feedback provided by YAB members following a review of the PEGISUS website.

Overall, YAB members appreciated the concept and structure of the website. However, they highlighted several areas for improvement to enhance clarity, accessibility, and user experience:

- Improve visibility of text on the homepage (e.g., the “E” in *Empower* is partially obscured by the background).
- Replace the current homepage image with visuals that more clearly reflect PEGISUS, particularly showing the transition from substance use to productive livelihoods.
- Strengthen messaging on drug and substance use support, ensuring it is as prominent as the vocational skills component.
- Simplify the language used across the website to make it more youth-friendly and accessible.
- Correct content on the Zambia page to accurately reflect skills offered (rough carpentry, steel fixing, bricklaying, and plastering).
- Improve mobile responsiveness, as several features are not easily viewable in portrait orientation.
- Adjust layout elements (e.g., reposition the dark/light mode toggle to improve visibility of other icons).
- Simplify and make the search function more intuitive.
- Add a photo gallery section to showcase programme activities and interventions.
- Translate the website into **local languages** across the three participating countries to improve inclusivity.
