

South Africa YAB inputs

The YAB members were satisfied with the current layout of the webpage, including the font, colours, content and the pictures, however they suggested the following improvements:

- Adding a short video clip to allow visitors to view a brief introduction on PEGISUS. It will also help for those who don't like reading.
- Including pictures of YAB members, as it will highlight their involvement as a key component of the study.
- Addressed the lack of email addresses to their peers. As the website currently only allows for email contact, they suggested adding a contact number section as an alternative.
